

### GHASED SMART BOMB

Ghased is a guided, long-range and 2000 pound bomb with an air- to- surface passive system. It has been designed by using the world's most advanced technologies. The bomb was designed to destroy military, economic and strategic targets in the depths of enemy territory. This guided bomb carries a 2000 pound warhead which gives it a very high destruction capability. Besides, the bomb's image guiding system is among the most advanced type of its own class.

#### MAIN TECHNICAL PARAMETERS

Type of bomb	GHASED
Type of aircraft	Western fighters (F4 , F5)
Guidance	Seeker (TV)
Length (mm)	4070
Diameter (mm)	400
Weight (kg)	1100
Type of explosive	H6/ Tritonal
Lugs span (in)	30
CEP (m)	≤ 10
