

## Marine Diesel Generator 18 KVA

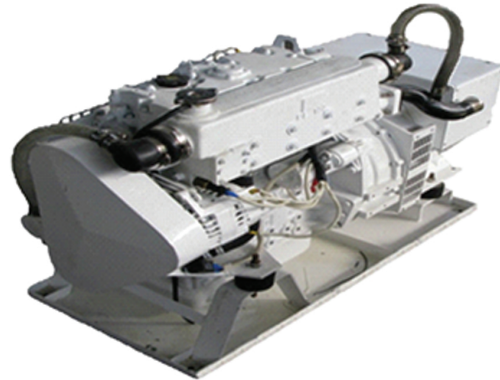

### DESCRIPTION

This type of engine is manufactured under NEMA MG1 & NEMA IC1 standard which can be utilized in high speed crafts and similar class vessels.

Moreover, this product is equipped with sound alarm system and automatic cut off, in a case of failure of cooling and lubricating system.

This engine is standardized according to the Iranian classification institute & defence standard center.

## Marine Diesel Generator 380 KVA

### DESCRIPTION

The main application of the diesel generator is in different types of military and commercial vessels and has the ability to be utilized in parallel with the main network or other diesel generators manually and automatically.

It also has the capability of automatic programming to turn on/off and Paralleling with respect to power

### SPECIFICATIONS

TYPE	Marine Diesel Generator 380 KVA	Marine Diesel Generator 18 KVA
Max Power	380/390 (KVA)	18 (KVA)
Uniform Power	343/350 (KVA) : 1500/1800 (rpm)	-----
Working Frequency	50/60 (hz)	50 (hz)
Working Voltage	220/380 (V)	230/400 (V)
Dimenssion(L×W×H)	2480 × 1200 × 1560 mm	1090 × 500 × 720 mm
Dry Weight Diesel Generator	2420 (Kg)	380 (Kg)
